- Typescript
- Azure DevOps
- HTML5, CSS3, and Sass
- JavaScript fundamentals
- Responsive web design
- Website accessibility requirements
- Working with APIs
- Using Git and GitHub Paired programming
- React

PROFESSIONAL EXPERIENCE

WEB DEVELOPER, PROMOTIONS - CONTRACTOR
Points.com Inc. | May 2023 - September 2023

- The **Promotions team** at **Points** generates the **highest revenue** for the entire company. It is a fast-paced team with firm deadlines, **building promotional work for large partners such as Air Canada, United Airlines, Marriott, and Virgin Airlines**.
- Developer tasks are: to create **countdown clocks, promotional banners, and instant offer button banners** using **HTML, CSS, JSON, Kickflip CLI, AWS3, and Gitlab**
- An example of the day-to-day: Self-assign a SOW ticket via **Salesforce.** Review details, and **communicate with relations managers** for assets, and check that mockup details are accurate. Use **JSON data** to generate and update promotional text via console, or use the **Kickflip CLI tool** to generate **countdown clocks or IOS banners.** Send the code for **QA** to review and test. **Merge branch** after **QA and UAT approval.** Prepare for **deployment** by communicating with the IT Ops team to **schedule the live date**. On the live date, ensure the changes are updated correctly before closing the SOW ticket. If the changes are not rendering, **resolve issues promptly.**

FRONT END WEB DEVELOPER
E-By Design Technologies Inc. | April 2021 - October 2022

- **Collaborated** on **features, and fixed bugs** using **Vue.js, TypeScript, JavaScript, Git, and Azure DevOps**. Debugged backend code in languages such as **.NET, C#, and SQL** with **mentor support**
- Conducted **quality assurance by running test cases and ensuring functionality before leaving the QA tier**
- Detailed **developer and QA documentation in Gitbook**

LEAD JAVASCRIPT AND WEB DEVELOPMENT MENTOR
Juno College | July 2021 - Present

- Teaching students JavaScript fundamentals, APIs, HTML5, CSS3, and responsive design
- Grading projects, assisting students with coding questions, and debugging during office hours
